MONÉT IS SOARCE AT TRUST UEAD-QUARTERS,

There is trouble in the Republican samp which was not expected by those hat bed of an i-imperialism. who were given the direction of poli ties during the canvass. The trusts have used McKinley to their advantage and have no additional use for him. as it seems proper to conclude as politice are developing at this time. It is clatmed, as stated by the trusts, that the Republican party is so strong that money is not required to secure his election. It may be that the temper of the people has comething to do with the scarcity of money at Republican headquarters.

There should be no doubt about the timid unture of capital, or about it becoming alarmed, when the people make it known they are cornect about Its encrosobments upon their rights. The propriety there is in sending usual for this time of the year, the Reconvent out west by special train is under disquesion, which, it is claimed. arives upon a failure of the trusts to Thunder storms, accompanied by rain draw their checks for amonn's expected. It had been arranged that New York's Governor should have a opecial when he went west, which would be more favorable to a proper exhibition of the intell-ctual ability of the man than could be had from the platforms of regular trains.

A failure by the trusts to respond in large sums has its meaning, which is not flattering to the future success of wheat and barley has been out and McKinley, or of the R-publican party. The chief disappointment connected with a failure of the trusts to respond will be anstained by the vice-presidenimproved by the disappointment. There are indications that point in the direction of truth when it is said that money is not as plentiful at trust headquarters as it might be.

The re will be no such sums of money for the Pacific coast in the present CAUVANA as there were in 1893 Mr. Hauna has made a statement that each Voter on the coast should deposit a MINES AND ballot to re-sleet McKiniey, as an offering for the large sums of the people's money expended on the coast for war supplies, which is not an argument that will secure votes, and there is not a main in the country who knows it will nor secure their better than Hunna, It is not what has been received, but it is what is expected that influences i politicate to devotion for his party.

Nevada State Journal collect to his mind the fact that it was in Boston harbor that the chief ton party connected wish the revolution had its meeting. Shoold it be that the tes party came to Mark's mind, it may have occurred to him as a matter for thought that the subject discussed at the party was taxation without representation, and that the Bostonians maintained the discussion on the opposite or negative side of the quesion. The discussion made a lasting i.ppression on the minds of the people of Boston and upon the minds of the people of the State of Massachusetts, which has not disappeared from the minds of their descendants.

Taxation without representation applied to the people of Porto Rico by McKinley and the mejority in Congrass presents to the people of the State of Massachusetts anew the subject so forceably presented in Roston harbor. It is concluded upon reports and statements made by Hanna that the descendents of the original debators continue to maintain the position of their ancestors on the question, which may explain to Mark and others was are seeking to imperialize the government of the United States the cause there is for making the State s

Beware of Cintments for Catarrh that Centain Mercury

As mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians as the damage they will do is ten fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O. contains no mercury, and is taken interally, acting directly upon the blood and mucous surface of the system. An Interesting Letter Concerning Matters Up the River.

Herbert Christy, a young man employed in the logging camp at the Sunrise mill, met with a serious if not fatal accident Tossday morning.

Young Christy, whose work is to assist in running logs down the chute, was working on the lower side, while five logs were being sent down the mountain and presumably on account of dampness, one of the logs jumped from the chute knocking Christy down.

After pushing him along for some distance the log passed over his body ornshing his arm in a frightful manner. nearly tearing it from its socket.

He also had several ribs broken and was apparently suffering from internal injuries. He was taken to his home in Rano.

The Journal's Copyrighted Prophecy as to Climatic Conditions.

(Copyrighted, 1900, by W. T. Foster.) Sr. Joseph, Mo., Aug. 25.-My last bulletin gave forecasts of storm wave to cross the continent August 21st Hon, J. F. Condon is in San Fran- to 25th warm wave 223 to 27th,

Storm disturbance will reach the Paoido coast about the 25th, cross west. of Rockies by the close of the 26th, great central valleys 27th to 29th, eastern states the 30th.

This will be a scorcher, but not of long continuence for a radical change to cooler will follow. This short hot spell will be of the drouth kind and will rapidly dry the soil.

Warm wave will cross west of Rockies about the 25th, great central valleys the 27th eastern states the 29th. A cool wave will cross west of Rockies about September 1st, great central valleys the 5th, eastern states the 7th.

This cool wave will bring the first frost to the northern States and southern Canada. It will be quite severe in the vicinity of the northern lakes, in northern New England and northern parts of New York. This frost will eatch some late corn

and together with the July and Angust drouths and destructive hail storms will complete the viciesitudes of that cereal up to that date.

Average temperature of September will be above normal and rainfall below, east of the Rockies, the reverse in the west.

Reno a Thriving

two railroads terminale and on the main line of the great transcontinental railway. Reno possesses possibilities that are profitably taken advantage of.

The Truckee meadows afford hay and pasturage for thousands of head of cattle, sheep and horses, and to these meadows the flocks and berds are driven every fall to pass the winter. Even this early in the year many flocks of sheep are driven or shipped to this vicinity, either to find sustenance on near by foot hills or on some valley range. Special trains convey live stock over the N. C. O. in great numbers every week; the V: & T. frequently brings down cattle from Southern Nevada.
